GGT

Petrochemical

The work began in 2006 when **GGT** entered the field of international trade in Turkey. Initially, GGT exported only petrochemicals and some of the country's products to neighboring countries such as Iraq, Turkey, the UAE, Qatar, and Ukraine. Now, after a decade, we have gathered a group of competent suppliers in Iran and the Middle East in the field of petrochemical raw products, supplying factories all over Europe and the U.S.

About Us

GGT
Petrochemical

GGT's skilled experts and consultants have provided the best services for our customers, aiming for their satisfaction as much as possible. This commitment has resulted in delivering customer orders in the shortest time, at the lowest cost, and with the highest quality.

At GGT, we not only provide raw materials for factories, but our skilled experts and sales partners also enable us to supply parts and machinery. This has allowed us to become one of the leading suppliers of high-quality components in various fields, including petrochemicals & mining. Our goal is to minimize our producers' concerns regarding the production of top-quality products & raw materials.

We are involved in virtually every facet of the oil, petroleum and energy industry & petrochemical as well as selective soft commodities, as we are also active in various developments and investment projects.

Our success:

shall be driven by our people and their commitment to get results the right way by operating responsibly; executing with excellence; applying innovative technologies and capturing new opportunities for profitable growth. The premise behind our group of companies is our belief that the resource sector, and in particular crude oil, continues to be one of the world's most dynamic sectors, which has experienced both explosive growth and tremendous challenges.

GGT
Petrochemical

Having our own design and construction and operational expertise for shipping and teams, state of the art EPC capabilities, and operational expertise for shipping and maritime infrastructure as well as feed stock supply and full financial capabilities without any third party financial institutions claim. we are willing and able to supply a full package of design-build projects and complete implementation of downstream, mid-stream, up-stream logistics, marine construction and feedstock transition.
